

Maryam Behzad

Game Developer in Training | Self-Taught Web Developer

[your email] | [your phone number] | [your city, province]

PROFILE

Game Programming student with a self-taught web development background. Motivated to build attractive, engaging games and user-friendly websites, and to keep learning new technologies. Friendly and approachable, and enjoys meeting new people and working with others.

EDUCATION

Game Programming – Centennial College
September 2025 – Present

Web Development – Self-Study
Self-taught through online learning and personal projects

TECHNICAL SKILLS

- **Web:** HTML, CSS, JavaScript, React, React Router
- **Programming Languages:** JavaScript, C# and C++ (game programming coursework)
- **Game Engines and Tools:** Unity, Unreal Engine, Git and GitHub, VS Code, Node.js and npm

GAME PROGRAMMING CONCEPTS

- **Game loop and architecture:** update/render cycle, frame rate and delta time
- **Object-oriented design:** classes, inheritance, polymorphism, component-based design
- **Game physics:** collision detection, rigid bodies, movement and gravity
- **Input and player control:** keyboard, mouse and gamepad handling
- **Game AI:** state machines, pathfinding (A*), enemy behaviour
- **2D and 3D graphics:** sprites, animation, vectors, matrices and transformations
- **Game design patterns:** state, observer, singleton, object pooling
- **Data structures and algorithms:** arrays, lists, queues, trees, sorting and searching
- **Audio, UI and level design:** sound effects, menus, HUD, scoring systems
- **Debugging, testing and optimization:** profiling and performance tuning

PROJECTS

Personal Portfolio Website (React)

- Built a multi-page portfolio site with React and React Router, including a navigation bar, project showcase and contact form, deployed online.

Star Runner (2D Game Concept, in planning)

- Designed the concept for a 2D endless runner: player movement, obstacle collision, scoring and increasing difficulty. Planned to build it with Unity and C#.

STRENGTHS

- Communication and teamwork
- Quick learner and eager to explore new tools
- Problem solving and attention to detail
